REPORT OF COMMUNITY MAPPING

As a part of Community Health Nursing curriculum, students are posted in adopted villages for community survey and community oriented activities. At the end of each community posting, students prepare an area map of the community where they were posted. The purpose of preparing area map is to identify the resources available and deficient in the area. The map includes the landmarks of the area, health facilities available, the environmental facilities available, the distance between major facilities, religious institution and transportation facilities. The map is framed and displayed in community lab.
