MENTAL HEALTH NURSING (OSCE)

PROCEDURAL SKILL

1.

Mr. Rajesh is a 20-year-old male who is in his second year of college. He is seeking treatment due to persistent fears that campus security and the local police are tracking and surveilling him. He believes that there is occasional lags in his internet speed as evidence that surveillance devices are interfering with his electronics. He occasionally laughs abruptly and inappropriately and sometimes stops speaking mid-sentence, looking off in the distance as though he sees or hears something. He expresses concern about electronics in the room (phone, computer) potentially being monitored and asks repeatedly about patient confidentiality, he doesn't want to come outside of his room and stating that he wants to be sure the police won't be informed about his treatment. His beliefs are fixed, and if they are challenged, his tone becomes hostile.

Question: Assess the all elements in thought and speech of Mr. Rajesh (8 minutes)

2. Mr. Rajesh is posted for Electro convulsive therapy. Describe your roles and responsibilities as a nurse in the ECT room **during the procedure of ECT** (7 minutes)
