REPORT ON ANIMAL HOUSE VISIT

As a part of enhancing knowledge in research, A visit to Animal house, Amala Institute of Medical Sciences was conducted on 20th Nov, 2023 for BSc Nursing 2022 batch. The visit was under the guidance of Mrs. Swiya K. The research staff gave an explanation about the various experimental species of rat and mice and the different rooms used in the research studies of these species. The main conditions under purview are cancer and diabetes. The various behaviours exhibited by the animals are carefully observed, recorded and analyzed. Samples are also collected to support the research theories. The visit was informative for the students and helped to broaden their knowledge about cancer related research.

2022 Batch.

REPORT ON ANIMAL HOUSE

As a part of NAAC, 1st year Bsc Nursing students of Amala College had a chance to visit "Animal House" in Amala Research Centre on 19th December 2022 at 2:30 pm. After reaching research centre the students of research centre took us to the different rooms where mice and rats were kept for the experiments. They buy animals from different places mainly from Mannuthy Veterinary House and were kept in isolation room for quarantine. After 2 weeks they were taken to analyse whether there is any presence of disease and other variations, then they were taken for the experiment. They provide separate room for quarantine, observation, experiments. The animals from which the sample should be collected are sacrificed in and others whose behaviours to be noted are placed in Rehabilitation centre.

The visit was a great opportunity for us to know about the various research procedures carrying out in Amala Research Centre and also enhanced our knowledge.
